

FinKOTE Rx

Advanced Anti-Microbial Protection

- Dramatically Reduces The Growth Of Germs On Surface
- 99% Effective Against Mold, Mildew, E Coli, H1N1 And MRSA
- Permanently Bonded To The Surface
- Destroys Microorganisms By Attacking the Cell Membrane

FinkOTE^{Rx} is specially formulated to protect your valuable assets from the risks associated with bacteria, mold and mildew contamination. It's odorless and colorless, and it's nanotechnology bonding chemistry will not rub off or wash out through repeated cleaning. NAHB reports that almost 28% of their inquiries from homeowners are about mold.

In effect, **FinkOTE^{Rx}** converts your entire establishment into a large-scale electrostatic air cleaner. This barrier is invisible, odorless and consumes no energy in the course of doing its job. It does not wear off with normal cleaning (even steam cleaning), is non-volatile, insoluble and will not harm people or the environment. As an added bonus, our technology inhibits the growth of bacteria, viruses, mold and mildew, while making it difficult for spills to attach themselves to surfaces, so stains are easier to remove and less likely to create more odors. We also save you money, by reducing the amount of cleaning agents you have to buy and the amount of time your staff spends cleaning. Don't let indoor air quality issues make your customers or staff uncomfortable. Choose **FinkOTE^{Rx}** technology to protect your image, freshen the air and reduce microbial contamination in your facility.

It does not Vent Off-Gases (VOCs) • It contains no CFCs. • It contains no ODCs. • It is non-toxic, non-flammable and non-hazardous. • It is safe for adults, children and pets
